WOW Global Corporation, LLC

**A Leader in Information Technology Staffing:
Growing Strong and Expanding Services**

Pittsburgh-based WOW Global Corporation, LLC is expanding its highly successful core business of information technology (IT) staff augmentation to cover a wider range of services. It now offers staff augmentation in four additional areas: human resources, finance and accounting, engineering and IT-enabled services.

"We pride ourselves in hiring the right people and deploying them to meet our customers' needs," says co-owner Subhash Chander. "We always try to be the first and the best, so why should we just limit ourselves to IT? Why not do it in other areas?"

"This will really help us serve clients across their various business units and become a complete staffing-solution company rather than just offering one service. It will open new doors for us."

The company maintains a customer-friendly price model by recruiting consultants from its clients' local markets, wherever they may be. "We find IT people in a very short time, sometimes with a 6-to-8-hour turnaround," Chander says. "We prefer to hire local consultants. It keeps our deployment and hiring costs low. This strategy helps differentiate us from other companies in the market."

The policy will remain as WOW Global moves into new areas of business, Chander says.

Since its founding in 2002, WOW Global has supported more than 350 IT projects worldwide deploying 1,000 IT consultants, and the firm continues to be an employee-centered company.

WOW Global has been rated by the *Pittsburgh Business Times* as the region's fastest-growing privately held company, and as one of the city's top five technology firms by the Pittsburgh Technology Council. In addition to being an SAP Services Partner, WOW Global qualifies as both a minority- and woman-owned business, enabling it to serve state, federal and private-industry clients who have supplier diversity programs.

And while it expands offerings, WOW Global is also diversifying its IT client base beyond *Fortune* 500 companies toward many others, especially in the public sector. WOW Global continues to grow by hiring a large consultant base and currently has consultants working in 25 states.

Services:

"WOW Global is a valued ProcureStaff recruiting partner, providing high standards of excellence in our global recruiting supply chain."

— Donald Truss, Program Manager
NEW Procurement Center

"WOW's customer-centric business model provides us with a unique balance of timely response and high-quality people at competitive rates."

— Indivar Khosla, IT Director
global rental car company

Global Presence:

Pittsburgh, Pa. (USA) • Gurgaon (India) • Dubai (UAE)

In addition to its headquarters in Pittsburgh, WOW Global has a Global Delivery Center in Gurgaon, India, and an office in Dubai, UAE. As a result, WOW Global is able to serve its customers globally, and provide consulting services to India-based companies as well as in the Middle East. "Our Global Delivery Center has really helped us grow in the Indian and the Middle East markets," Chander says.
